The following is an examiner's statement of reasons for allowance: The prior art does not teach to normalize the secondary electron signal in a scanning electron microscope by either changing the electric field used to direct secondary electrons to a detector in accordance with the point of incidence of the primary electron beam on the sample, comparing the secondary electron signal generated at a designated point of incidence of the primary electron beam on the sample to a predetermined reference signal, or both, so that variations in the final output signals generated by directing the same particle beam to different sites on a sample can be accurately attributed to variations in the nature of the sample at the different sites rather than to different spacings between the sites and the detector.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jack I. Berman whose telephone number is (703) 308-4849. The examiner can normally be reached on M-F (8:30-6:00) with every second Friday off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John R. Lee can be reached on (703) 308-4116. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9318.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0956.
